

Kahoot

Quiz-10 Directional Drilling, Torque & Drag Essentials

Put your drilling know-how to the test with questions on drillstring buckling, BHA selection for building angle, torque and drag analysis, friction types, MWD benefits, anti-collision methods, and sur... [Show more](#)

Questions (15)

1 - True or false

Increasing the stiffness of the drillstring helps in reducing the risk of buckling.

◆ True ✓ ▲ False

2 - Quiz

Which type of BHA Assembly to tangent section?

▲ Fulcrum ◆ Packed Hole ✓
● Pendulum ■ Drop

3 - Quiz

Which type of BHA Assembly to build inclination?

▲ Fulcrum ✓ ◆ Packed Hole
● Pendulum ■ Drop

4 - True or false

A lower friction factor is typically observed in cased holes with oil-based mud.

◆ True ✓ ▲ False

5 - Quiz

Which of the following reduces the likelihood of buckling in the drillstring?

▲ Decreasing stiffness (EI) ◆ Adding lubricants to reduce wellbore friction ✓
● Increasing radial clearance ■ Using dry drilling techniques

6 - Quiz

What are the three stages of buckling in a drillstring?

▲ Linear, angular, and circular ◆ Smooth, rough, and locked
● Static, kinetic, and dynamic ■ Sinusoidal, helical, and lock-up ✓

7 - Quiz

One key benefit of MWD is...

- ▲ Allows automatic drilling
- ◆ Delivers real-time directional and toolface data ✓
- Provides delayed formation evaluation
- Removes the need for casing design

8 - True or false

Torque and drag models are used only during well planning and not during drilling

◆ True ▲ False ✓

9 - True or false

Anti-collision is a mathematical method of accepting a collision with an existing wellbore

◆ True ▲ False ✓

10 - Quiz

Choose the items below regarding **Methods of scanning** to avoid colliding with another well

- ▲ Horizontal Plane ✓
- ◆ Closest Approach (3D) ✓
- Travelling Cylinder & Scan ✓
- Minimum Distance ✓

11 - Quiz

What is the function of Torque and Drag analysis?

- ▲ To evaluate the feasibility of drilling a well profile ✓
- ◆ To determine the amount and position of HWDP ✓
- To determine required pipe specifications ✓
- To evaluate hole condition in real time ✓

12 - Quiz

Torsional friction (torque) acts in which direction relative to the drillstring?

- ▲ Opposite to the direction of pipe rotation ✓
- ◆ Along the axis of the pipe
- In the same direction as mud flow
- In a random direction

13 - Quiz

What type of friction occurs when two surfaces are not moving relative to each other?

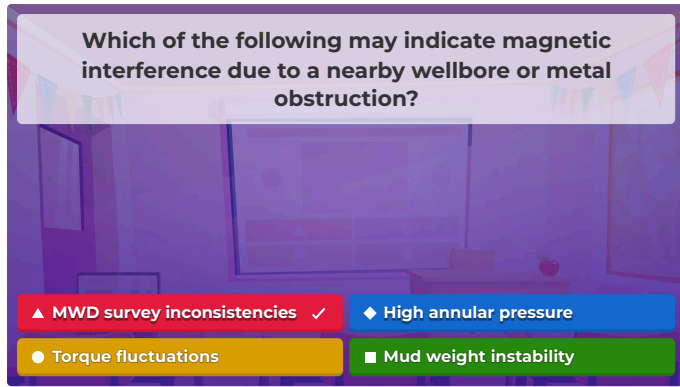

- ▲ Kinetic friction
- ◆ Static friction ✓
- Torsional friction
- Hydrodynamic friction

14 - Quiz

The ellipsoid of uncertainty (3D) includes errors in which three primary directional survey components?

- ▲ Mud weight, torque, and RPM
- ◆ Hook load, pressure, and bit rotation
- Inclination, azimuth, and measured depth ✓
- Dogleg severity, WOB, and circulation rate

15 - Quiz
