

Kahoot

Quiz 12 - Casing Design, Depth Selection & Handling

Test your knowledge of well control concepts, formation pressures, and API Buttress casing connections. From kick tolerance essentials to gas-well suitability and yield strength identification, this q... [Show more](#)

Questions (20)

1 - Quiz

In the context of kick tolerance, what factor is critical to avoid during a kick?

- ▲ Fracturing the previous casing shoe ✓
- ◆ Lost circulation
- Reaching TD before expected
- Running out of mud

2 - Quiz

Which of the following hole sizes typically has the largest kick tolerance volume?

- ▲ 6" and smaller
- ◆ 12¼"
- 23" ✓
- 8.5"

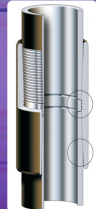

3 - Quiz

Which of the following causes abnormal/subnormal formation pressure?

- ▲ High density mud
- ◆ Low permeable layer ✓
- High porosity layer
- High permeable layer

4 - True or false

API Buttress Casing connection with spacer ring proposed "No Gap" in connection

- ◆ True ✓
- ▲ False

5 - True or false

API Buttress Casing Connection suitable for gas well

- ◆ True
- ▲ False ✓

6 - Quiz

What is the yield strength (psi) from the following casing description: 13-3/8", 68 ppf, L-80, R-3, BTC

- ▲ 55,000
- ◆ 80
- 68
- 80,000 ✓

7 - Quiz

What is the casing length (ft) from the following casing description: 13-3/8", 68 ppf, L-80, R-3, BTC

☒ 40 ✓ ☐ 25
☐ 54 ☒ 34 ✓

8 - True or false

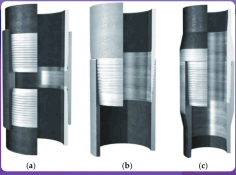

Casing cross over utilized when the two casing's pin & box to be connected are having different thread

☒ True ✓ ☐ False

9 - Quiz

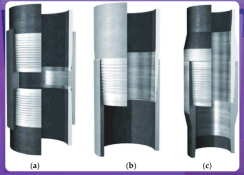

Which type of casing connection categorized as Integral Flush connection?

☒ A ✓ ☐ B
☐ C ☒ None of above

10 - Quiz

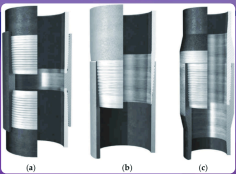

Which type of casing connection categorized as Integral Upset connection?

☐ A ☒ B ✓
☐ C ☒ None of above

11 - Quiz

During casing handling, which type of casing connection suitable with Side Door Elevator?

☒ A ✓ ☐ B
☐ C ☒ None of above

12 - Quiz

Which the following pressure considered in Burst Load casing calculation?

☒ Cementing & Pressure Test ✓ ☒ Completion - Set Packer ✓
☐ Drilling LOT ☒ Overpull

13 - True or false

Strongly recommend to run Long String Design for Geothermal Well

☒ True ☐ False ✓

14 - Quiz

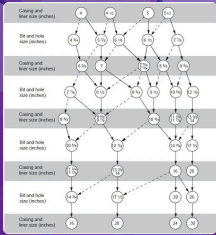

In casing design, what is the main basis of the bottom-up approach?

☒ Kick Tolerance ✓ ☐ Rig Capacity
☐ Bit Selection ☒ Cement Quality

15 - Puzzle

If the final reservoir section requires a **7" liner**, arrange the correct **hole size** and **casing program** (top to bottom).

- ▲ 12-1/4" Hole ✓
- ◆ 9-5/8" Casing ✓
- 8-1/2" Hole ✓
- 7" Liner ✓

16 - Quiz

A mechanical gripping tool used to hold and suspend the casing string on the rotary table during running casing ops.

- ▲ Single joint elevator
- ◆ Spider elevator
- Casing slip ✓
- Stabbing guide

17 - Quiz

A "joint" of casing is identified by these parameters....

- ▲ Outside Diameter ✓
- ◆ Steel grade ✓
- Normal weight/ foot ✓
- Type of thread ✓

18 - Quiz

List three considerations in selecting casing setting points

- ▲ Pore pressure, Shallow hazard, Kick tolerance ✓
- ◆ Cement slurry, Formation dip, Production rate
- Surface temperature, Depth, Pipe cost
- Wellhead type, Mud tank volume, Surface rig

19 - Quiz

Why does pore pressure prediction is critical in casing design?

- ▲ To select drill bit
- ◆ To determine casing setting depth ✓
- To improve mud properties
- To determine kick tolerance

20 - Quiz

Which standard utilised for casing design specification guideline?

- ▲ API 5CT ✓
- ◆ API 53
- ISO 11970
- ISO 45001
