

Kahoot

Quiz 19 - Well Control Principle and Equipment

Test your knowledge on the fundamentals of drilling and well control. This quiz covers topics like hydrostatic pressure, pressure gradients, well kicks, BOP stacks, and well killing operations. Are yo... [Show more](#)

Questions (12)

1 - Quiz

What is the Hydrostatic Pressure of 500 ft well full of 10 ppg mud?

500 ft
10 ppg

☒ 260 psi ✓
☐ 26 psi
☐ 5000 psi
☐ 2600 psi

2 - Quiz

What is the pressure gradient of the 9 ppg fluid in the 500 ft TVD well?

☐ 0.468 psi
☒ 0.468 psi/ft ✓
☐ 234 psi
☐ 2340 psi

3 - Quiz

How much would the hydrostatic pressure be reduced?

0 ft.
1000 ft.
 $\Delta \text{HP} = 77 \text{ psi}$
Mud Weight = 9 ppg

If the fluid level of a 9 ppg in the wellbore fell by 1000 ft due to loss circulation

☐ 900 psi
☒ 468 psi ✓
☐ 1000 psi
☐ 416 psi

4 - True or false

If the trip log shows a short fill-up while POOH, perform a flow check. If no flow, we can continue POOH

☒ True ✓
☐ False

5 - Quiz

Constant BHP methods are used to maintain BHP at a level equal to or slightly greater than which pressure?

☒ Formation Pressure ✓
☐ Slow Circulating Rate Pressure
☐ Drill pipe Pressure
☐ Casing Pressure

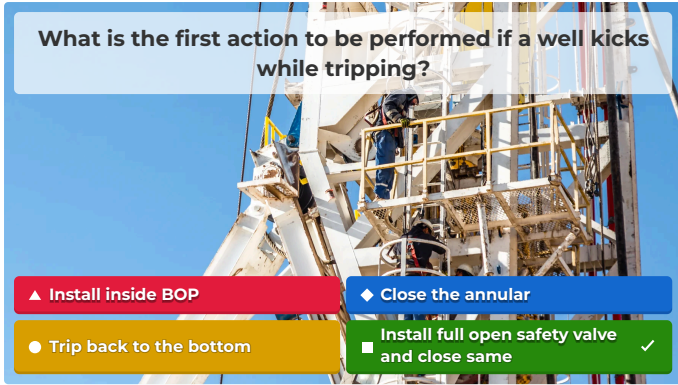

6 - Quiz

Which pressure does not increase when gas migrates in a closed well?

☐ Casing shoe pressure
☒ SICP
☐ BHP
☒ Gas bubble pressure ✓

7 - Quiz

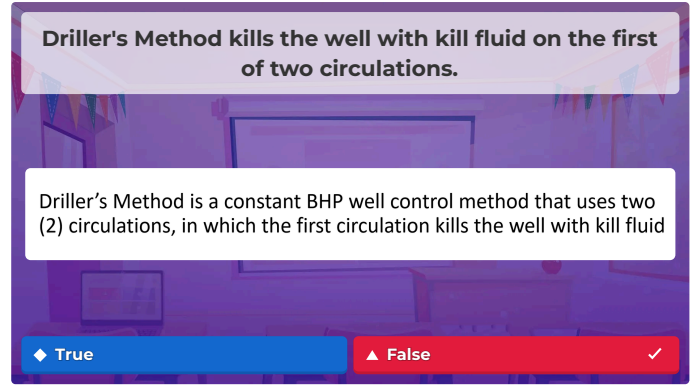

What is the first action to be performed if a well kicks while tripping?

☐ Install inside BOP
☒ Close the annular
☐ Trip back to the bottom
☒ Install full open safety valve and close same

8 - True or false

Driller's Method kills the well with kill fluid on the first of two circulations.

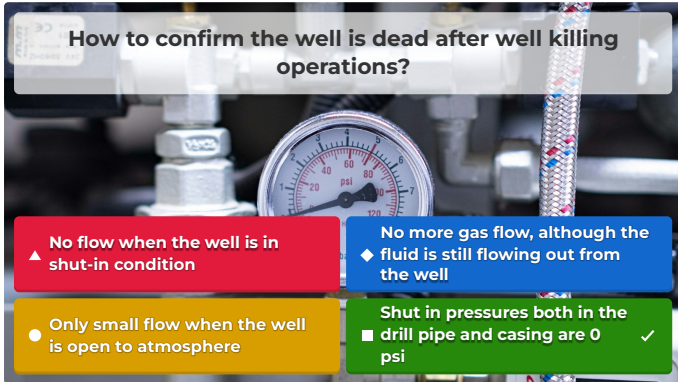

Driller's Method is a constant BHP well control method that uses two (2) circulations, in which the first circulation kills the well with kill fluid

☒ True
☐ False

9 - Quiz

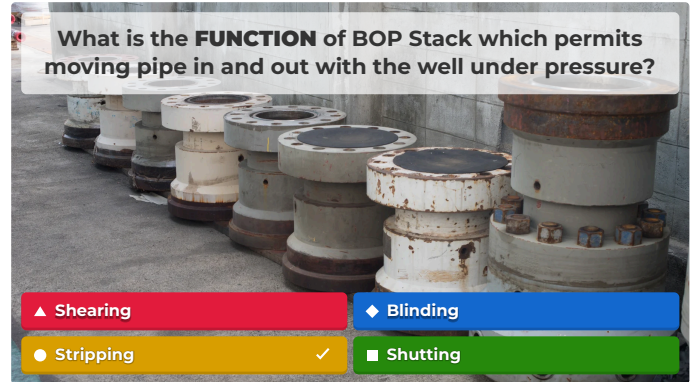

How to confirm the well is dead after well killing operations?

☐ No flow when the well is in shut-in condition
☒ No more gas flow, although the fluid is still flowing out from the well
☐ Only small flow when the well is open to atmosphere
☒ Shut in pressures both in the drill pipe and casing are 0 psi

10 - Quiz

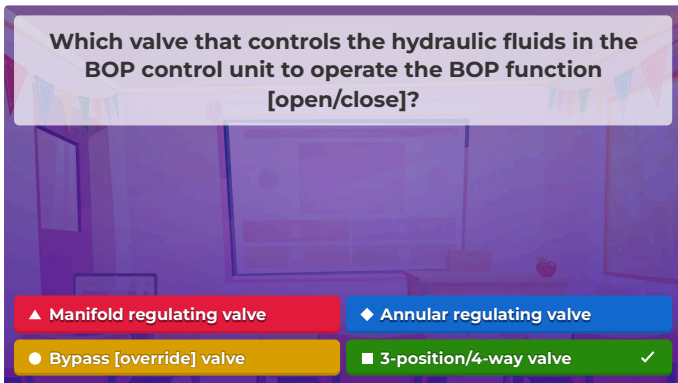

What is the **FUNCTION** of BOP Stack which permits moving pipe in and out with the well under pressure?

☐ Shearing
☒ Blinding
☒ Stripping
☐ Shutting

11 - Quiz

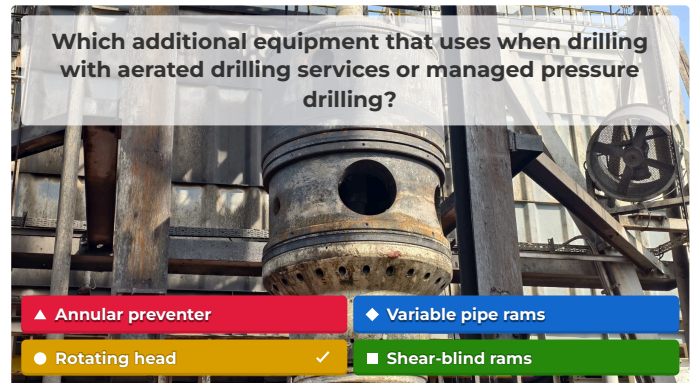

Which valve that controls the hydraulic fluids in the BOP control unit to operate the BOP function [open/close]?

☐ Manifold regulating valve
☒ Annular regulating valve
☐ Bypass [override] valve
☒ 3-position/4-way valve

12 - Quiz

Which additional equipment that uses when drilling with aerated drilling services or managed pressure drilling?

☐ Annular preventer
☒ Variable pipe rams
☒ Rotating head
☐ Shear-blind rams
